

# Single-use Balloon Dilatation Catheter Wire-guided Progressive Dilatation Balloon

### • Excellent Deliverability

- Soft and tapered tip allows less invasive advancement across the stricture.
- Low-profile design reduces resistance and increases crossability and trackability.

### • Operational Efficiency

- Facilitate placement within tight strictures and tortuous anatomy.
- Optimized balloon deflation time.

### • Optimized Balloon Design

- The balloon component is designed to offer stability during stricture dilation.
- Semi-compliant material engineered to adapt to biliary duct.

## Specifications

REF	REF			REF			Minimum Working Channel (mm)	Unit/Box
	Length (mm)	Diam. (mm)	Nominal Pressure (atm)	Length (mm)	Diam. (mm)	Structure		
KZ0655G2	55	6-7-8	3-4.5-6	1800	2.4	Wire-guided	2.8	1
